

John Sweeney

I joined the group as a Foundation Governor in September 2020. My commercial career started at Nielsen, an Oxford market research company. I continued in this discipline of marketing and market research, working mainly in London, in the cosmetic industry, pharmaceuticals, consumer goods companies and also consultancies specialising in market research. On leaving corporate employment I started my own consultancy company and after ten years I retired. Prior to moving to Kennington we lived in Warwickshire, where I very much enjoyed being a Community Governor in our local village primary school. I hope this and my business experience will help me contribute to the governing board in supporting the school.
